Examiner's Amendment

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

The application has been amended as follows:

In the **Specification**:

On Page 1, first paragraph, of the Specification, substitute the following
Continuing Data for the existing Continuing Data:

This application is a continuation in part to U.S. Patent Application Serial Number 09/322,478, now U.S. Patent 6,331,662, which application was filed May 28, 1999, which application claimed priority to U.S. Provisional Patent Application Serial Number 60/087125, filed May 29, 1998.

The above amendment was necessary to update the status of the parent application.

It is noted that applicants have filed a CIP of the instant application, said application (10/395,607) claims subject matter in common with the instant application. Claim 1 of the '607 application recites an isolated nucleic acid having at least 60% identity with nucleotide sequences which include the instantly claimed SEQ ID NO:62 as

Art Unit: 1636

well as cells transformed with said sequence. The subject matter of claim 1 of the '607 application falls entirely within the scope of claim 15 of the instant application, that is, the SEQ ID NO:62 of the '607 application is the same as SEQ ID NO:62 recited in the instant claims. Put another way, claim 1 in the '607 application would anticipate claim 15 of the instant application. Therefore, a provisional Obviousness Type Double Patenting rejection against claims 15-16, 28-29 and 34 would be appropriate; however, since said provisional rejection would be the only remaining rejection, it is withdrawn and the application passed to issue (See MPEP 804). A provisional Obviousness Type Double Patenting rejection will be made in the '607 application and said rejection will be converted into a regular Obviousness Type Double Patenting rejection upon issuance of the instant application.
